DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3-5, and 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Peltola et al.

Peltola et al. shows a working assembly for a fire fighting vehicle having a boom system including components 3 and 13, the working assembly comprising:

- a frame 12 mounted to an end portion of the boom system, the frame having a first end, a second end, and a midpoint between the first and second ends;
- a mechanical actuator 33 mounted to the frame;
- a tool 7 connected to the mechanical actuator, the tool configured to pierce an exterior of a structure via movement of the mechanical actuator;
- wherein the frame 12 is pivotally mounted to the end portion of the boom system and the midpoint of the frame is pivotally mounted to the end portion of the boom system as recited in claims 3 and 4.

Allowable Subject Matter

Art Unit: 3752

3. Claims 2, 6, 7, 18, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 8-13 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Coughlin and Larsson et al. are pertinent to Applicant's invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
